NEWS RELEASE

Penguin Computing Receives Data Center Solution Innovation Award

2012-04-26

Penguin Computing, experts in high performance computing (HPC) solutions, has been awarded the 2011 Data Center Solution Innovation Award from Intel® during this year's Intel® Solutions Summit. The award is given to the company that best demonstrates the successful deployment and integration of a data center or server solution resulting in superior return on investment for the client. "The Penguin team developed a differentiated and leading edge offering with Penguin Computing on Demand," said Charles Wuischpard, CEO, Penguin Computing. "As a company, we are honored to be recognized by Intel for our offering. We will continue to devote our efforts into innovative solutions and maintain a leading role in the space." Penguin Computing on Demand is an HPC cloud that offers the flexibility and security of a virtualized user interface with the power and dependability of a bare-metal computing environment. Designed to meet the most demanding technical computing needs, PODs are being used by commercial, academic and government organizations world-wide to augment or replace their on-premise high-performance computing or storage systems. Intel Solutions Summit is the largest channel event where Platinum Partners get a chance to hear the latest industry and Intel news, attend courses on new technologies and Intel products, and meet with a number of other Intel channel partners.
