NEWS RELEASE

Penguin Computing’s CTO Phil Pokorny to Keynote at AMD Fusion Developer Summit

2012-06-06

Penguin Computing, experts in high performance computing (HPC), is pleased to announce that CTO Phil Pokorny will present a keynote at the AMD Fusion Developer Summit (AFDS). The second annual event will take place June 11 - 14, 2012 in Bellevue, Wash., where industry leaders will gather to delve into key strategies and market trends in the areas of heterogeneous computing, OpenCL and related technologies. “My talk will focus on the recent developments in HPC, the impact of APUs, and the future of HPC in general,” said Phil Pokorny, CTO of Penguin Computing. “As a system builder and integrator, Penguin is in the middle of the market between suppliers and users, which gives me a valuable and unique insight into the HPC computing market and the demands of developers and end users.” Mr. Pokorny is responsible for all aspects of Penguin Computing’s hardware products. He joined Penguin Computing in February 2001 as an engineer, and has steadily taken on more responsibility in Penguin's hardware organization.
